

Portable UV and PCO Air Purifier

Model: 9600PP

User Manual

* Please read the user manual carefully before using.

1. OVERVIEW

The portable purifier uses a filter to remove particulate from the indoor air. A ultra violet germicidal light addresses mold, bacteria and viruses in the air, while the PCO (Photo-catalytic Oxidation) process reduces odors and volatile organic compounds (VOC's).

2. USES

Our portable air purifier can be used in many residential or commercial environments to remove particulate, mold, odors and VOC's.

For example:

- a) Cars, Trucks
- b) Boats
- c) RV's
- d) Bedroom, Office
- e) Bathroom
- f) Etc.

3. OPERATION

- To switch ON/OFF the product is OPEN/CLOSE the shell of the helmet.
- Connect to the adaptor (Please use the automobile adaptor when it use in car)

4. CAUTION

- After use, cut off the power by unplugging the socket.
- Do not covers anything on the product otherwise the efficiency may decrease.
- Keep out to the place temperature over 40°C.

5. SPECIFICATIONS

Operation Voltage: 12V DC
2 AA Batteries
Power Consumption: 6W
Maximum Current: 500mA
Noise: < 30dB
Service Area: 102 m²
Dimensions: H110 x W105 x D131 (mm)
Net Weight: 0.25 kg

6. ACCESSORIES

- a) PCO Air Purifier
- b) Automobile Adaptor
- c) 2 AA Rechargeable Batteries
- d) User Manual
