Second Wind Model 7512 Product Guide

IT'S NOT WHAT YOU SEE.
IT'S WHAT YOU DON'T SEE.

You wouldn't drink this glass of dirty water.
Why breathe dirty air?

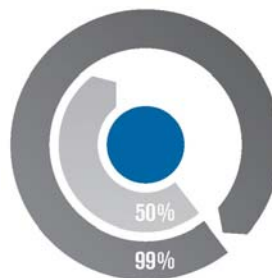

POLLEN

BACTERIA

MOLD

E-COLI

VIRUS

INDOOR POLLUTANTS

In studies conducted by the EPA, it has been found that indoor levels of pollutants may be between 50% and 99% higher than outdoor levels.

The 7512 Model Air Purifier features 3 stage filtration with superior UVC class Germicidal Light & patented Photo-Catalytic Oxidation (PCO) process to remove bacteria, mold, viruses, odors and off-gases.

Filtration alone can only trap particulates of a certain size. They do not battle microscopic bioaerosols, odors, vapors, and other pathogens not bound by gravity. The Second Wind 7512 brings it all together to create the cleanest air you can breathe.

THREE-PHASE FILTRATION

Polyester Pre-Filter

First line of defense—removes larger particles such as lint, hair, dust and pollen.

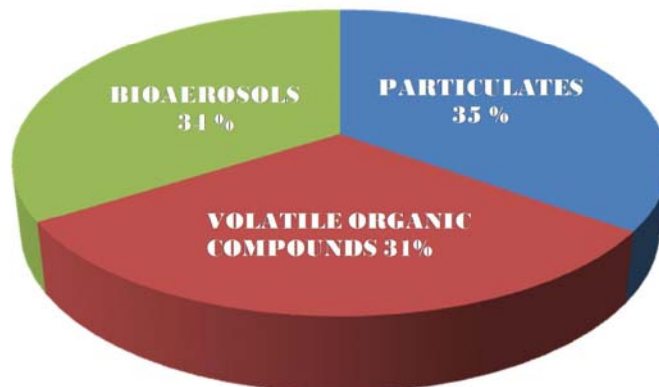

Activated Carbon Filter

The 'chemical' filter—eliminates gasses and odors by trapping and absorbing their molecules.

HEPA Filter

Removes micro-particles—smoke, dust mites, spores, mold, spray paint, ashes, even most viruses!
